

LIFE LESSONS

I've learned- that you can do something in an instant that will give you heartache for life.

I've learned- that it's taking me a long time to become the person I want to be.

I've learned- that you should always leave loved ones with loving words. It may be the last time you see them.

I've learned- that you can keep going long after you think you can't.

I've learned- that we are responsible for what we do, no matter how we feel.

I've learned- that either you control your attitude or it controls you.

I've learned- that regardless of how hot and steamy a relationship is at first, the passion fades and there had better be something else to take its place.

*Ham radio is a friendly joining of great people,
enabling lasting friendships to be cherished.*

She was the air under my wings...

By now most people know that I lost my Jeannie on Monday, March 27. Her obituary on March 31st in Fridays Oregonian gave "just the facts, ma'am." Of course it couldn't begin to describe the fantastic life we enjoyed together.

The obit made it sound like she moved to Riverside, but actually, after her graduation from Oregon State in 1943, she and her sister, Mickey, flew down to Hemet, CA where I was at primary flight school. Because it was a civilian flying school (Ryan) there wasn't a chaplain. We had to go to March Army Airfield, in Riverside and were married on June 11th, 1943.

The memories from that beginning flow like fine wine from a bottle. An example: She was pregnant and about to deliver. We attended the base movie theater in Marfa, Texas showing the "Canterville Ghost" when her labor pains started. She would not leave until the movie was over! She presented me with twin boys on her birthday.

The highlight of our life was our trip to France in 1972. We had been there two years earlier to visit my daughter, Gayle, who was studying at the University of London, and Jeannie worked in a five day trip to Paris! I went nuts! Despite the fact that flunking French 3 three times kept me from earning a high school diploma I wanted to return!

I came home determined to learn the language. In 1972 an opportunity came so that we could spend six weeks in France! Some time I will tell you about the time we tried to interview Jean Patou, the most famous perfumer in France. (Joy) Besides Paris, we followed a trail from my French lessons...the cathedral at Chartes, Mt. San Michelle, St. Malo, the beach at the mouth of the Loire, The

My Jeannie 1921 – 2000

chateaux of the Loire, (Castles) the wine country of Bordeaux, the Cognac region, the Dorgonne, home of fois gras, cassollet and truffles, and their Cchateaux, the double walled city of Carconsonne, La Lavendoux, and Nice. There also were lots of fortified mills, bridges and churches along the way.

It would be impossible to describe all the wines, breads and the foods of each region. Believe me when I tell you, they were...superb!

Other great memories were annual trips to Ashland for the Shakspeare Festival & Peter Britt concerts in Jacksonville with good friends. The Dipsea Net adventures, and watching the grandkids develop.

If any of you are just half as happy as we were through almost 57 years of marriage, you'll know what a great life it was.

THE POOREST GUY

I've learned- that heroes are the people who do what has to be done when it needs to be done, regardless of the consequences.

I've learned- that money is a lousy way of keeping score.

I've learned- that my best friend and I can do anything or nothing and have the best time.

I've learned- that sometimes the people you expect to kick you when you're down will be the ones to help you get back up.

I've learned- that sometimes when I'm angry I have the right to be angry, but that doesn't give me the right to be cruel.

I've learned- that true friendship continues to grow, even over the longest distance. Same goes for true love.

I've learned- that just because someone doesn't love you the way you want them to doesn't mean they don't love you with all they have.

Lake Simtustus Spring Opener

Once again the Dipsea Netters enjoyed the sunny Madras area to start spring camping off with sunshine and flowers. Some of us went a little early and took advantage of the hospitality at the McCool Compound. Jerry arranged for sunshine and herds of deer browsing in the open fields every day. We also got to meet the kids, grandkids and greatgrands. What a nice family Jerry and Dorothy have.

One day we piled in the van and toured the Ochoco area and visited Ochoco Reservoir,

Painted Hills, lunch at Fossil and home via Antelope, Clarno and Madras. Another day we drove to Sisters via Cove-Palisades,

Our gang at the Balancing Rocks.

Grandview, Metolius River campgrounds, cross country over hill and dale until stopped by snow, backtracked to a lower road and eventually got to Sisters where we had a nice lunch. On the way home we took the back roads again and came out past the Bentonite mines and Crooked River Ranch. Sorry many of you missed out on these adventures. Better come next time.

Back to camp, Jerry & Dorothy brought their speedboat for water skiing. All who wanted had a nice conducted tour of Lake Simtustus up to Round Butte Dam. Sites along the way included many waterfalls from springs, ducks, deer, geese, swallows, cormorants, and other birds we couldn't identify. Since it was a week before fishing

We had 15 RV rigs in camp and some local visitors, namely Carol Bailey and Roger N7RFV. Carol brought the camp scones and

with travel and helping other travelers. We think we had 34 for Saturday potluck. In addition to Carol, RFV Roger, AQE John & Sandy, DRI Dick & Marilyn, MPC Bob & Melba, ZXW Gib & Blondie, DOP Doris and her 3 dogs, FHB Dan & Darlene, HCR Jerry & Dorothy, DZB Don & Hazel, ABT Bill & Viv, CSU Don & Joan, 7W Larry & Charlie, &C Carl & Esther, ROG Jack & Margaret, HRG Charlie & Hazel, LL Harry & Jean. (I hope nobody counts noses cuz I may have missed someone.)

Except that we were SHORT on Food, (Ha! Ha!) and some people were still hungry, the quality was EXCELLENT. We also went to the Elks for dinner on Thursday—they served us a super good meal and the price was right. Where else can you get a steak dinner for seven bucks? Our usual Sunday A.M. breakfast took place at 6 A.M. sharp at the Stag in downtown Madras. They

I've learned- that maturity has more to do with what types of experiences you've had and what you've learned from them and less to do with how many birthdays you've celebrated.

I've learned-that people you aren't related to can take care of you and love you and teach you to trust people again.

I've learned- that no matter how good a friend is, they're going to hurt you every once in a while and you must forgive them for that.

I've learned- that it isn't always enough to be forgiven by others.

I've learned-Sometimes you have to learn to forgive yourself.

I've learned- that no matter how bad your heart is broken the world doesn't stop for your grief.

I've learned-that our background and circumstances may have influenced who we are, but we are responsible for who we become.

I've learned- that just because two people argue, it doesn't mean they don't love each other And just because they don't argue, it doesn't mean they do.

I've learned-that we don't have to change friends if we understand that friends change.

I've learned- that you shouldn't be so eager to find out a secret. It could change your life forever.

I've learned- that two people can look at the exact same thing and see something totally different.

IN THE HUMAN RACE

I've learned-that your life can be changed in a matter of hours by people who don't even know you.

I've learned-that even when you think you have no more to give, when a friend cries out to you, you will find the strength to help.

I've learned- that credentials on the wall do not make you a decent human being.

I've learned- that the people you care about most in life are taken from you too soon.

Where did ya learn to drive—ya big dummy!

The one thing that unites all human beings, regardless of age, gender, religion, economic status or ethnic background, is that, deep down inside, we all believe that we are above average drivers.

Chauncey Williams, N7CLI

Chauncey was born in Rushville, Nebraska on February 12, 1928. His dad was a Stationary Engineer at the Pine Ridge, South Dakota Power Plant and the nearest hospital was across the state line to which his mother, Lorena was taken for his birth.

His early years was taken up starting at a new school every year. His dad's work in construction required a move every time he started a new job. Chauncey's grade school years were spent in South Dakota, North Dakota and Washington. He attended Highline Junior High School in south King County Washington where he was two years ahead of HRY's Jo. He graduated from Pierre High School in South Dakota. He then attended South Dakota State University where he graduated with a MBA in Civil Engineering and Business.

It was while he was there that he met and

fell in love with Mary Alice Larsen. They were married two days after graduation. They moved to Pierre, S.D. where Chauncey took a job with the research dept. of the Highway Division. Four years later he took a job with the Guy F. Atkinson Construction Company.

During the next 33 years he was sent to many projects of the Atkinson Company. The Marine Barge yard in Long Beach, CA. the drilling platform in the Santa Barbara Channel. He worked on the Harbor Freeway in LA, the Swift Power Houses at Cougar, WA., the Trinity Dam in Northern California, the Ice Harbor Dam on the Snake River, the Feather River project in California. Then he was sent to Willamette Iron & Steel Co. Shipyard in Richmond, CA. This supposed two year assignment lasted 17 years. Atkinson closed that yard as the graving docks were too small to meet the new, larger ships. He was sent to the Atkinson yard in San Diego and finally to their yard in Portland. Finally, he worked for Bingham Pump Co. in Portland. Chauncey retired on November 1, 1987 at the ripe old age of 59.

He made a promise to Mary Alice that he would retire on his 60th birthday. She wanted them to have a few years together. "We had four years," Chauncey stated. "She passed away from a heart attack and a stroke while we were in Salem at the State Fair."

Six years later, with the help of Jean, KA7LEP, and Harry, KD7LL, a breakfast was arranged so he could meet someone. This took a turn he did not believe would happen. He met and fell in love with Charlene. They married on September 27, 1997. "Life is beautiful when you have such a companion as Charlene," says Chauncey.

In 1973 Chauncey responded to an ad in the Richmond, CA paper for ham classes given by the Richmond ARC. He received his first call letters, WN6VDW, that year and seven months later made his General call, WA6VDW. When he moved to Vancouver he asked for his present call, N7CLI.

A participating, carrying member of the amateur community Chauncey is an active member of the Vancouver ARC and our net. If you ever need a guillotine repaired—call Chauncey.

A man decides to take the opportunity while his wife is away to paint the toilet seat.

The wife comes home sooner than expected, sits, and gets the seat stuck to her rear. She is understandably distraught about this and asks her husband to drive her to the doctor. She puts on a large overcoat so as to

cover the stuck seat, and they go.

When they get to the doctor's, the man lifts his wife's coat to show their predicament. The man asks, "Doctor, have you ever seen anything like this before?"

"Well, yes," the doctor replies, "but never framed."

Harry, KD7LL, & Jean's next venture is a visit to his favorite place, Costa Rica. They left about midnight Sunday April 14th and were in San Jose at noon. They stayed with friends who toom them around the country to view areas of interest.

This was Harry's fourth trip and Jean's second. A new facet was added this time His granddaughter, who speaks French, Spanish and a smattering of English, e accompanied them. They had a terrific time because their friends were fantastic hosts and, best of all, didn't want them to spend much money. They'll will be back with a lot of new lies and pictures on June 2nd.

A man who smelled like a distillery flopped unto a subway seat next to a priest. The man's tie was stained, his face was plastered with red lipstick, and a half empty bottle of gin was sticking out of his torn pocket. He opened his newspaper and began reading.

After a few minutes the disheveled guy turned to the priest and asked, "Say, Father, what causes arthritis?" "Mister it is caused by loose living, too many women, too much alcohol and contempt for your fellow man." "Well, I'll be damned," the drunk muttered, returning to his newspaper.

The priest thinking about what he had said, nudged the man apologizing, "I'm very sorry. I didn't mean to come on so strong. How long have you had arthritis?" "I don't have it, Father. I was just reading here the Pope does."

FCC to Generals—Advanced subbands off limits!

A lot of newly upgraded General Class licensees have begun asking if they may operate in the current Advanced class subbands. "The answer is *absolutely not!*" said Bill Cross, W3TN, of the FCC's Public Safety and Private Wireless Division. "No privileges changed for any license class."

Cross pointed out that the Advanced Class license did not cease to exist under restructuring, which went into effect on April 15. He said current Generals do not earn Advance Class privileges until they upgrade to Amateur Extra class, at which point they

earn both Advanced and Extra class privileges.

The FCC also says General Class operators may hold only Group C (1x3) OR Group D (2X3) call signs.

Cross cautioned newly upgraded licensees to check the revised Part 97 rules carefully to make sure they are not operating beyond their privileges. "Now that they've gotten the license, it's time to look at the real rules."

Revised FCC Part 97 rules are available on the ARRL Web site.

Lemon joke of the week

There was once a bartender who was convinced he was the strongest guy in town. He had a standing bet. He'd squeeze a lemon until all the juice ran into a glass, then pass the lemon to his customers—and anyone who could squeeze even one more drop of juice would win \$1,000 cash.

Now, many lemon squeezers had tried to beat the bartender (weight lifters, longshoremen, etc.) but nobody ever could.

One day a scrawny little man came into the bar and in a squeaky voice said, "I'd like to try squeezing your lemon." After the laughter died down, the bartender grabbed a lemon, squeezed it dry, then handed the wrinkled rind to the little man. The man clenched his fist around the lemon, squeezed—and six drops fell into the glass.

As the crowd roared, the bartender paid the \$1,000 and asked the little man, "What do you do for a living? Are you a lumberjack, a weight lifter—what?"

The man replied, "I work for the IRS."

Greely said, "Go west, young man" so naturally Ken went North.

I sure didn't know that Ken owned a
 soup & fish! They had a terrific cruise
 from College Fjord to Vancouver B.C.
 and all points in between. They saw

glaciers, critters, and the
 fleshpots of Alaska.

The food and accommodations were great. They were upgraded to an outside veranda deck with all the trimmings—personal printed stationary, chocolate mints on the pillows and all that jazz. Ken got to play on one of three rehearsal spinets (Yamahas), but not on the nine grand pianos aboard. He gained so much weight that the ship's doctor thought he was pregnant, and Jo gained 15 pounds. Tooodles, on the other hand, lost 10 pounds while they were gone
